PERSONAL STATEMENT

Frontend and Mobile Engineer with hands-on experience designing, building, and shipping production-level applications across web and mobile platforms. I hold a B.Sc. in Physics from the University of Ibadan, which has sharpened my analytical thinking and systematic approach to problem-solving qualities I bring directly into software architecture and performance optimization. I have worked on multiple production-level applications involving authentication systems, real-time features and API integrations. I enjoy taking ownership of features end-to-end and building systems that are reliable, maintainable, and designed for real users especially in environments with low bandwidth and device constraints.

EDUCATION & CERTIFICATIONS

2021 – 2025 **Bachelor of Science, Physics** University of Ibadan, Nigeria

- Graduated with a strong foundation in Computational Physics, Data Analysis, and Mathematical Methods in Physics.
- Final year project: "Geophysical Evaluation of Subsurface Layers for Structural Foundations using Electrical Resistivity"

2023 – 2024 **Software Engineering (Backend Track)** ALX Africa

- Intensive programme covering systems programming, backend development and data structures .
- Completed projects involving API development and performance optimization using languages like C, Python, and Node.js.

2022 – 2023 **Frontend Web Development** FreeCodeCamp

- Completed structured curriculum in responsive web design, JavaScript algorithms, and frontend frameworks.
- Built multiple projects including a personal portfolio, and a markdown previewer using HTML, CSS, JavaScript.

2025 – Present **National Youth Service Corps (NYSC)** Federal Republic of Nigeria

- Currently serving in the NYSC program, contributing to community development and national service initiatives.

TECHNICAL SKILLS

LANGUAGES: HTML | CSS | JavaScript | TypeScript | Python | LaTeX | NodeJs

PHP (Basic) | Solidity (Basic) | C (Basic)

FRAMEWORKS/LIBRARIES: React | NextJs | React Native | React Native (Expo) | Vue (Basic) | Angular (Basic)
ExpressJS | NestJs | Laravel | Django (Basic)

DATABASE: MongoDB | PostgreSQL | SQL (Basic)

TOOLS: Firebase | Supabase | Moodle | Git/Github | Linux/Unix

PROFESSIONAL EXPERIENCE

Years	Role	Company
2025 – Present	Frontend/Mobile Developer (Intern)	Extension Africa
• Built and maintained mobile and web applications using React and React Native • Improved performance and structure of an existing web platform through refactoring. • Designed and implemented authentication flows, onboarding systems, and responsive UI components. • Collaborated within a cross-functional team using modern development workflows.		
2025 – 2026	Mobile Developer	Play2score
• Building a mobile and web application using React Native and Expo for an organization. • Integrated Supase for user authentication, real-time data, and notifications. • Designed onboarding, login/signup, forms and all UI with responsive layouts. • Collaborated with a team of 3 using Git and GitHub, and other social platform.		
2024 – 2025	FullStack Developer (Personal Project)	ExcelExchange
• Developed a crypto trading app enabling users to swap cryptocurrencies for local fiat currencies. • Designed and built responsive UI using React (web) and React Native (mobile). • Displayed real-time crypto price data using APIs and charting libraries. • Focused on user-friendly flows for wallet authentication, local transaction records, and conversion tracking.		
2024 – 2025	FullStack Developer (Personal Project)	CoinBitExtension
• Built a decentralized dApp extension focused on interacting with blockchain networks. • Integrated wallet connect functionality for Ethereum and Solana using WalletConnect and Phantom. • Designed responsive UI with React, TailwindCSS, and Next.js. • Worked with smart contract interactions for on-chain transactions. • Implemented backend with Node.js and MongoDB (in progress). • Hosted MVP with Vercel and managed codebase via GitHub.		
2023 – 2024	Mobile Developer	CampusRide
• Built and deployed a mobile and web application using React Native and Expo for university-based transportation. • Integrated Firebase for user authentication, real-time data, and notifications. • Designed onboarding, login/signup, and driver-rider selection flows with responsive layouts. • Collaborated with a team of 2 using Git and GitHub, and practiced agile methodologies.		
2025 – 2026	Frontend Engineer & Project Lead	Branovax Technology
• Led a 3-member team to design and deploy custom web solutions for clients, utilizing NextJS with SEO Implemented. • Owned end-to-end project delivery and developed scalable web applications tailored to client requirements. • Implemented secure authentication, real-time data dashboards, and responsive UI/UX.		

- Learned industry-level photography and editing workflows during a 6-week industrial training.
- Assisted in editing promotional media and handling client photography sessions.
- Developed a basic photo gallery portfolio site using HTML, CSS, and JavaScript.

PROJECTS

Project	Stack	Link
Branovax Technology	NextJS, TailwindCSS, Node.Js, PostgreSQL	Live Dashboard
Extension Africa Academy	NextJS, TailwindCSS, Moodle(PHP), Apache	Live Dashboard
Excel Exchange	Vite+React, React Native, TailwindCSS, Node.Js, MongoDB	Live Dashboard
Personal Portfolio Website	NextJS, TypeScript, TailwindCSS, EmailJs	Live Dashboard
CoinBitz Extension	Vite+React, TailwindCSS, ExpressJs, Web3.Js PostgreSQL	Live Dashboard
CampusRide App	React Native, Expo Router, NativeWind, NodeJs, Docker	Github Repository
Twitter Gain App	HTML, CSS, JavaScript, BootStrap	Github Repository
JetSender	NextJS, TypeScript, TailwindCSS, NodeMailer	Github Repository
Telegram Notify Bot	NodeJS, JavaScript, BotFather	Github Repository

INTEREST & OTHER ACTIVITIES

Blockchain & Web3: Active interest in decentralised finance (DeFi), smart contract development with Solidity, and building user-friendly dApp interfaces.

Physics & Computing: Background in physics informs strong interest in computational thinking and graphical modeling.

Open Source: Actively maintain personal repositories on GitHub; interested in contributing to open-source tools.

Community: Interested in developer communities and knowledge sharing especially in the tech ecosystem.
