

Hadi Ademola Surajudeen

Software Engineer | Web & Mobile Developer

Phone: +234 813 855 3465 | Email: hadiademola@gmail.com | Location: Abuja, Nigeria

Website: hadiademola.com | GitHub: github.com/Hardeygold205 | LinkedIn: linkedin.com/in/Hardeygold205

Summary

Software Engineer specializing in web and mobile development with experience building production-ready applications using React, React Native, and Node.js. Strong in API integration, real-time systems, and scalable backend architecture. Background in Physics with a structured and analytical approach to problem solving. Passionate about building reliable, maintainable, and user-focused products.

Technical Skills

Languages: JavaScript (ES6+) | TypeScript | Python | HTML | CSS
Backend: Node.js | Express.js | REST APIs | WebSockets | Authentication (JWT, OAuth, OTP)
Frontend: React | Next.js | React Native | TailwindCSS | State Management (Zustand, Redux)
Databases: PostgreSQL | MongoDB | Redis
Tools & Platforms: Git | Docker | Supabase | Firebase | Vercel | Linux
Concepts: System Design | API Design | Real-time Systems | CI/CD | Agile

Experience

Nov 2025 – Present **Frontend/Mobile Developer** Extension Africa

- Built and scaled cross-platform web and mobile applications using React and React Native, improving performance and user experience.
- Refactored legacy codebases to enhance maintainability and reduce technical debt.
- Implemented secure authentication systems and integrated APIs to deliver production-ready features.

May 2025 – Sept 2025 **Mobile Developer (Contract)** Play2score

- Developed a cross-platform mobile application using React Native and Expo Router with real-time features powered by Supabase.
- Implemented authentication, real-time data synchronization, and push notifications for core user interactions.
- Collaborated in a team environment using Git to deliver scalable and maintainable features.

Aug 2024 – Apr 2025 **Fullstack Developer & Project Lead** Branovax Technology

- Led a 3-member team to design and deliver client-focused web applications using Next.js.
- Built scalable full-stack solutions, handling frontend, backend, and database architecture.
- Implemented authentication systems, real-time dashboards, and SEO-optimized interfaces.

Education

2021 – 2025 **B.Sc. Physics** University of Ibadan, Nigeria

- Strong foundation in computational methods, data analysis, and mathematical modeling.

2023 – 2024 **Software Engineering (Backend Track)** ALX Africa

- Trained in backend systems, data structures, and scalable application development.

2022 – 2023 **Frontend Web Development** FreeCodeCamp

- Built multiple projects including a personal portfolio, and a markdown previewer using HTML, CSS, JavaScript.

Projects

Branovax Technology Next.js, TailwindCSS, Node.js, PostgreSQL Live Application

- Developed and deployed a client-focused web platform with SEO optimization and scalable backend architecture
- Built full-stack features including authentication, dashboards, and database-driven workflows

Extension Africa Academy Next.js, TailwindCSS, Moodle (PHP), Apache Live Application

- Built and deployed a learning platform integrating a Next.js frontend with a Moodle-based LMS
- Configured Apache server and optimized performance for production deployment

Auth System API Node.js, Express.js, Redis, PostgreSQL, JWT GitHub Repository

- Designed a scalable authentication service with JWT-based access control and refresh token rotation
- Implemented Redis caching to improve performance and secure session management

Play2score App React Native, Expo Router, NativeWind, Node.js, Docker Live Application

- Built a production-ready mobile application with real-time features and user engagement functionality
- Integrated authentication, push notifications, and backend APIs to support core app operations
